*All RED asterick fields must be completed.

Prod ID * :
Distributor part number

Description:
Printed on the barcode label; 80 characters max

Custom:
Field to store custom information

Location:
Omit for vending machines, include for storerooms

On Hand * : 0 Default = 1 note: cycle count at installation will make the correct adjustment

Pack/Min Order Qty: 0
Pack Quantity or Multiple of the Pack Quantity required for the minimum order

Min: 0
Reorder generated when on hand plus on order falls 1 below minimum

Max: 0
Max is compared to Expected On Hand Qty to calculate Suggested Reorder Amount. Must fit into selected storage space.

Item Cost * : 0.00 Default = 0.0001 when using the "UPLOAD TEMPLATE
Customer Price

Default Issue Qty * : 1 packaging is noted using the UoM
Transaction quantity with each scan (for issues and returns)

UoM * : view options

Category: This is the summary of Categories created at: **Configuration > Product Categories**

OEM:
Product Manufacturer's name

OEM Number:
Product Manufacturer's part number

Customer P/N:
Part number assigned in customer's system, if different from Product ID

Barcode on Item:
Barcode found on product's original packaging

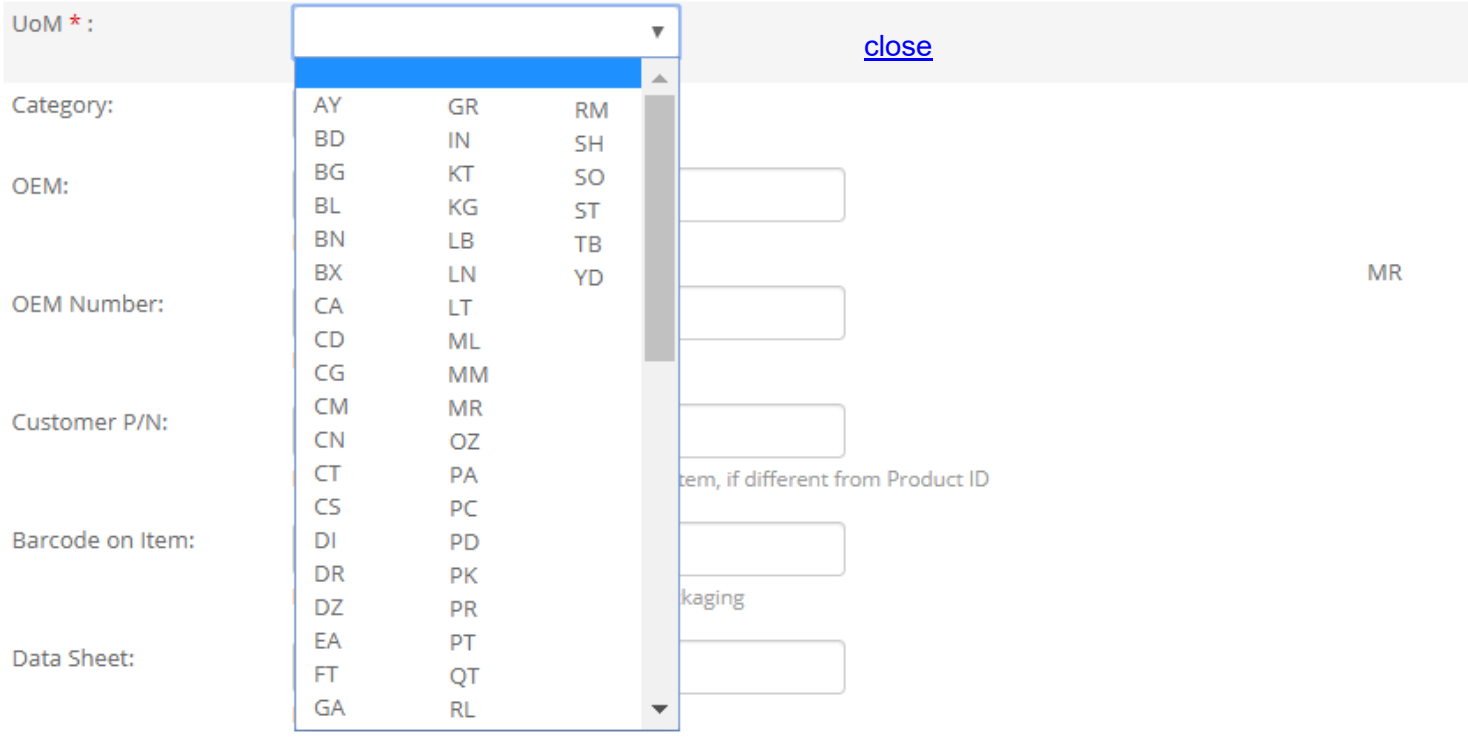
Data Sheet: view example This may be used as a photo reference to any valid web address
Link/HTTP URL to this item's data sheet

Consignment: Identifies item as Consignment. allows a specific **Advanced Search** Option for consignment.

Advanced Item Tracking: N

Active * : Y

Create



N = Not active.
This option will keep transaction history intact but will no longer be able to be transacted. or visible to the user.
see also: Deleting a record from database.

close

Advanced Item Tracking: Y

Maximum Checkout Duration: 8

Hours allowed between checkout and return. Must be whole hours

Last Service Date: 2015-11-13 10:42:00

Number of Checkouts Between Service: 10

Max Duration and Number of Checkouts can be used together

Calibration/Expiry Date: 2019-05-02

Can be used for Calibration due date, or Product expiration dates

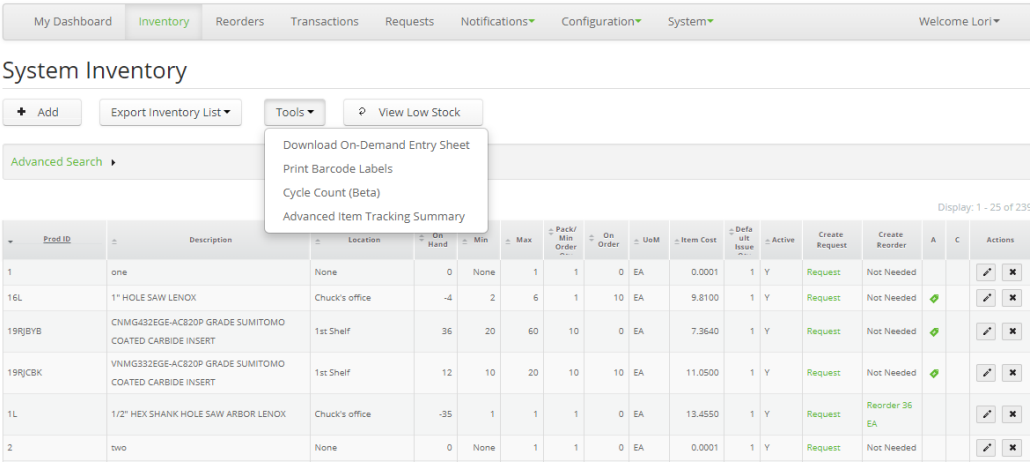
Inventory > Tools > Cycle Count

- The intelligent cycle count module uses smart algorithms to suggest items to be cycle counted.
- Regular CYCLE COUNTS over the course of a year will maximize its accuracy.
- Generating the list is 1-click; counts can be recorded using your computer, smartphone or printed paper.

1	**Location**	**Inventory > Tools > Cycle Count** • Login to the SSO • Open the Storeroom • Inventory > Tools > Cycle Count
		



next

2	**Cycle Count OPEN** • Overview	**Open**: The window opens showing all **OPEN** Cycle Counts. **Closed**: Click to view all closed Cycle Counts. **Generate**: Generate a new Cycle Count **Advanced Search**: Locate a specific Cycle Count using: • Unique Cycle Count Count ID • Date Range • Open: Y/N • Sequence Number **Table Summary:** • Cycle Count: Unique ID number • Date Created: Start Date • Number of items: Number of Items remaining that have not been adjusted. • Record Counts: Continue working on the Cycle Count.
	 continue	

close

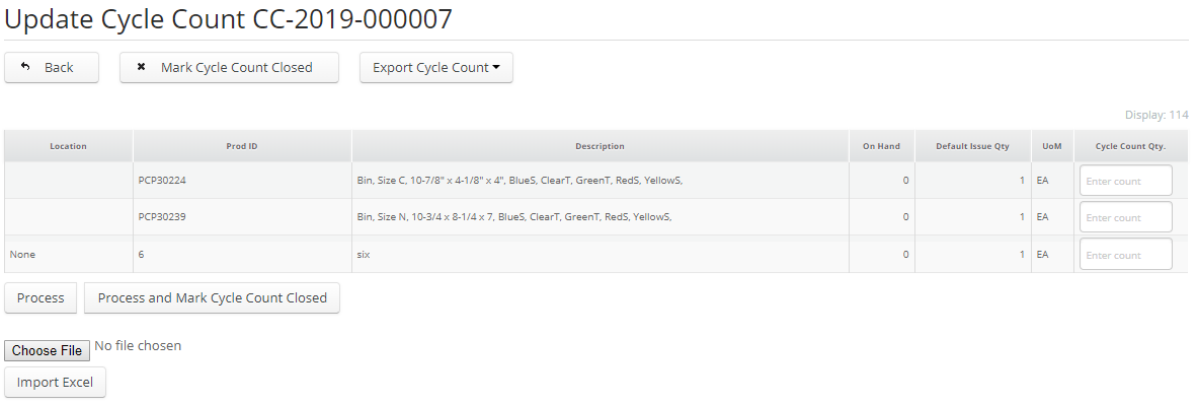
3	**Cycle Count CLOSED:** View previous cycle count data. • Select: **SEARCH** or **VIEW INFO** to view the summary counts on each item from **System Inventory**. Each item is noted whether or not it has been updated and the quantity adjustment change. 
continue

close

4	**Generate:** Select an action from the image below to learn more or continue 
continue

close

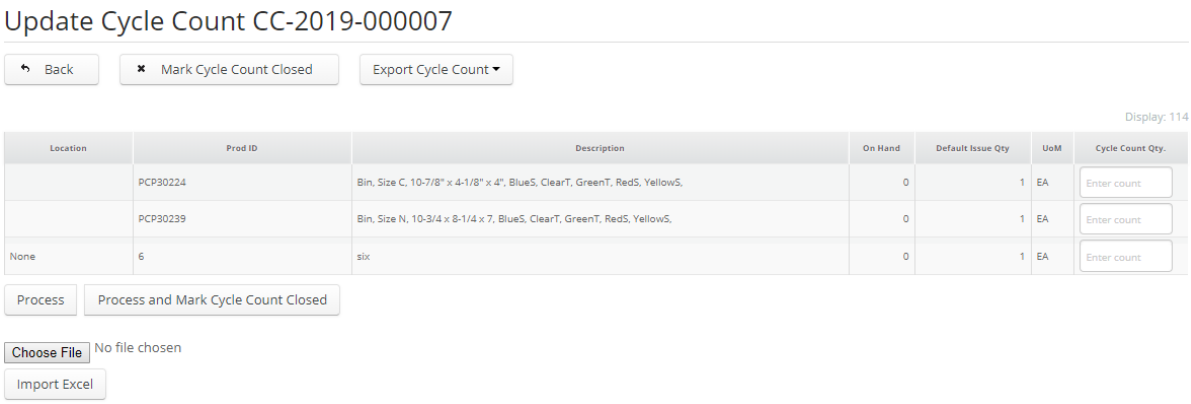
5	**Smart Cycle Count List:**	Generates a new Cycle Count session and displays the list for adjustment. • Each cycle Count has a **Unique ID** **MARK CYCLE COUNT CLOSED:** **EXPORT CYCLE COUNT:** • **PDF**: Take the Cycle Count list with you to the site in PDF. • **EXCEL:** Edit the file on from your computer then import it back into the cycle count. **PROCESS:** Saves the current changes but does not adjust System Inventory. Used to pause a session for later. **PROCESS AND MARK CYCLE COUNT CLOSED:** Saves the changes, Processes the update changes to the inventory table then closes the count. **CHOOSE FILE / IMPORT:** You must select **xlsx** file first then import excel button to change the table. • You will still need to **Process** to save and continue later or **Process and mark closed** to complete the session.
		



continue

close

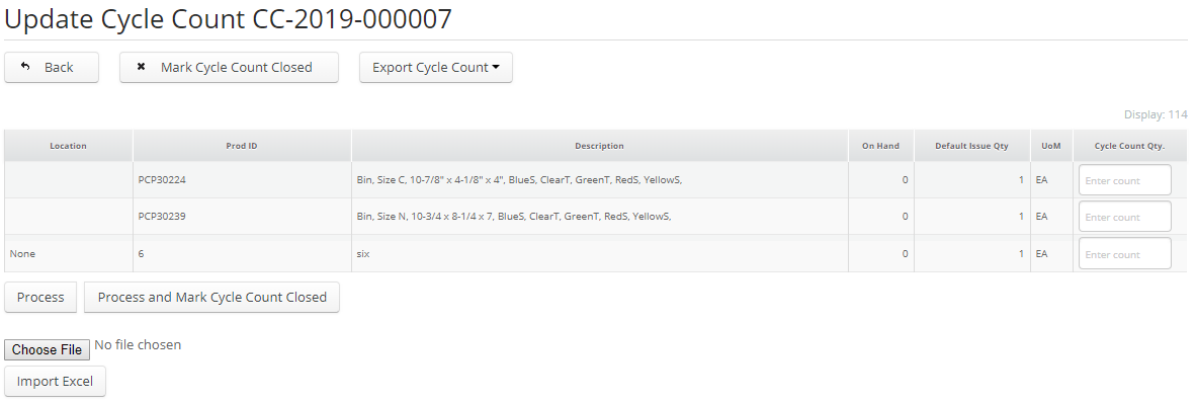
6	**Smart Cycle Count List with Inactive items**	Generates a new Cycle Count session and displays the list of all items that have not had any transactions for adjustment. • Each cycle Count has a **Unique ID** **MARK CYCLE COUNT CLOSED:** **EXPORT CYCLE COUNT:** • **PDF**: Take the Cycle Count list with you to the site in PDF. • **EXCEL:** Edit the file on from your computer then import it back into the cycle count. **PROCESS:** Saves the current changes but does not adjust System Inventory. Used to pause a session for later. **PROCESS AND MARK CYCLE COUNT CLOSED:** Saves the changes, Processes the update changes to the inventory table then closes the count. **CHOOSE FILE / IMPORT:** You must select **xlsx** file first then import excel button to change the table. You will still need to **Process** to save and continue later or **Process and mark closed** to complete the session.



continue

close

7	**Physical Inventory / Entire Storeroom Count:**	



continue

close

8	**Physical Inventory / Entire Storeroom Count with Inactive items:**	

continue

close

9	**Advanced Search:**	**Advanced Search**: Locate a specific Cycle Count using: • Unique Cycle Count Count ID • Date Range • Open: Y/N • Sequence Number

continue

close

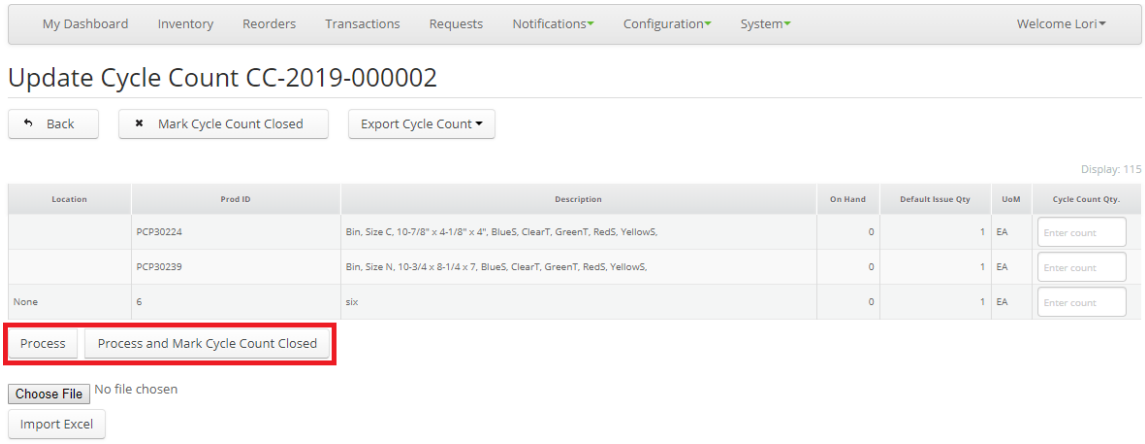
10	**Summary Table:**	**Table Summary:** • Cycle Count: Unique ID number • Date Created: Start Date • Number of items: Number of Items remaining that have not been adjusted. • Update: Record Counts link

continue

11	**Record Counts** Update/ complete open count sessions.	Any cycle count that has been started will show within the table summary. • **Click on RECORD COUNTS to continue an unfinished cycle count,**

The Inventory Table opens in Cycle Count mode.
- Complete the previously started Cycle Count
- When done select one of the following:

Process: Saves the current changes.
Process and Mark Cycle Count Closed: Saves the changes, Processes the changes to the inventory table then closes the cycle count session.



Enter the Cycle count quantity for items using from a list, file, email, etc. into the system. You may also use your phone to perform the cycle count by logging into the SSO from its browser.

- **Pause a Cycle Count to continue later:** Scroll to the bottom of the page and click on:
  - **PROCESS:** Your count has been saved for later.

- When completely through with cycle count.
  PROCESS AND MARK CYCLE COUNT CLOSED: Completes the Cycle Count session. Inventory will be updated with new counts upon CLOSED.

EDI Configuration

When enabled, the machine will automatically generate reorders for low stock items and upload the resulting EDI 850 document to the SFTP location specified.

Enable EDI Transfer: ☐

SFTP Host: localhost

SFTP Port: 5922

SFTP Username: user

SFTP Authentication: Password

SFTP Password: pass

EDI Receiver ID: 9999999999

Your EDI Receiver ID number, typically a corporate phone number.

EDI Ship To: 1507300800

Your desired Ship To value for this machine. Defaults to machine Serial Number.

EDI Site Info:

If specified, this value will be used in Contract # (BEG-06) and Ship To (N1~ST-04) fields. Additionally, Release # (BEG-04) will comprise this value and the PO Number.

EDI Schedule:

☑ Sunday ☑ Monday ☑ Tuesday ☑ Wednesday ☑ Thursday ☑ Friday ☑ Saturday

EDI processing will run at 3:00 AM of the machine's local time zone on the selected days.

Include Manual Reorders: ☐

If selected, manually created reorders will be included in the EDI 850 document

Submit
